## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 17, and 18, drawn to a pressure sensitive adhesive sheet.

Group II, claim(s) 10-15, and 19, drawn to a method of removing a solvent containing substance.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The adhesive sheet as disclosed by the applicant is not considered to be novel since the applicant has recite any material can be used for the pressure sensitive adhesive sheet and pressure sensitive adhesive sheets are well known in the art. For example, Tanaka (JP 10-250043) discloses a cleaning sheet for cleaning printing screen with pressure adhesive. The adhesive sheet is considered to be capable of absorbing and removing the solvent from the solvent containing substance.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A, an adhesive sheet with a pressure sensitive adhesive layer, which  
absorb 20 g/m<sup>2</sup> of solvent after immersed in solvent for 3 minutes.

Species B, an adhesive sheet with a pressure sensitive adhesive layer, which absorb 5 g/m<sup>2</sup> of solvent after immersed in solvent for 1 second.

Species C, determining the solubility parameters between the pressure sensitive adhesive and the solvent contained in the solvent-containing substance.

5, 17

Species D, the pressure sensitive adhesive has fine particles.

6

Species E, the pressure sensitive adhesive sheet has antistatic treatment.

16, 17, 18

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A: claims 1, 8, 9, and 10

Species B: claims 2-4, 8, 11, and 12 ✓

Species C: claims 5, 8, 13, and 14

Species D: claims 6-8, 15

Species E: claims 16-19

The following claim(s) are generic: none. \_\_\_\_\_

Art Unit: 1734

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species do not have the same special technical features such as the pressure sensitive adhesive layer absorb 20 g/m<sup>2</sup> of solvent after immersed in solvent for 3 minutes, pressure sensitive adhesive layer absorb 5 g/m<sup>2</sup> of solvent after immersed in solvent for 1 second, determining solubility parameters between the adhesive and solvent in the solvent containing substance, the adhesive contain fine particle, or the pressure sensitive adhesive sheet has antistatic treatment.

6. A telephone call was made to Gerald M. Murphy Jr. on November 7, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made as Mr. Murphy was not available.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
